

About Blackmagic Camera Utility

Welcome to the Blackmagic Camera Utility!

This software package allows you to update your Blackmagic Camera to the latest software release for new features, bug fixes and other enhancements.

Please ensure that your camera is plugged into mains power before running the software update.

What's new in Blackmagic Camera Utility 1.9.3

Blackmagic Pocket Cinema Camera

- Add histogram, time remaining and audio level indicators. Use Up and Down to reveal and hide the meters while Left and Right will adjust the aperture of your active MFT lens.
- Fixed bug where in-camera playback may sometimes drop frames.

Blackmagic Cinema Camera

- Add histogram, time remaining and audio level indicators.

Blackmagic URSA

- No changes

- No changes

Blackmagic Studio Camera

- No changes

Blackmagic Studio Camera 4K

- No changes

Minimum system requirements for Mac OS X

- Mac OS X 10.9 Mavericks or later
- Mac OS X 10.8 Mountain Lion or later
- A suitable USB 2.0 port
- Thunderbolt port for UltraScope and Media Express when using Blackmagic Cinema Camera or Blackmagic Production Camera 4K

Minimum system requirements for Windows

- Microsoft Windows 8 64-bit
- Microsoft Windows 7 64-bit
- A suitable USB 2.0 port
- A suitable Thunderbolt port when using Blackmagic Cinema Camera or Blackmagic Production Camera 4K

Installing Blackmagic Camera Utility

Before installing the software, we recommend that you run "Uninstall Camera Utility" first.

After loading the software on the Blackmagic Cinema Camera EF or MFT, you may notice a slight flickering on the built-in LCD screen. This is normal and expected behaviour. The flickering will go away after a few minutes of operation.

The Blackmagic Camera Installer package installs:

- Blackmagic Camera Utility
- Blackmagic Media Express
- Blackmagic UltraScope
- Blackmagic Disk Speed Test
